These T-Harnesses are compatible with any Excalibur remote start. These are built to OEM or better quality standards and are made with 100% copper wire for maximum current delivery and reliability. These plug-in harnesses provide remote start critical connections and help you avoid straining sensitive data wires or compromising high current circuit integrity. You can even adapt these to ANY remote start brand using FlashLogic, iDatalink BLADE or ALCA modules.

- Get OmegaLink install convenience AND CrimeStopper Performance
- Use what's already on your shelf!
- Connect directly to the BLADE port on the Excalibur AL-XX70-B
- Includes an adapter for using the OL-MDB-ALL, ALCA, FLCAN with <u>ANY</u> system
